Presentation

Official module of Iziflux.

Iziflux lets you deliver your product catalog of over 500 comparators.

Iziflux will refund the full cost of the module.

Module Features

This module provides a control interface to:

Segment its catalog to publish only one of its offerings on a support (eg in-stock or only seasonal offering).

- Disable unprofitable products, automatically or manually.
- Edit files its mass-produced.
- Categorize automatically or manually its products within the tree of the different partners.
- To enrich the content of its catalog.
- Add massively missing information such as EAN codes for example.

Ex: It may be interesting to change the titles and product descriptions based on the recommendations and algorithms of each medium, including driving a catch phrase for Christmas or winter sales.

Iziflux will refund the full cost of the module (price credited to your monthly subscription to our solution)

To Take advantage of this offer and activate your license iziflux thank you for contacting us on <http://www.iziflux.com/iziflux-export-catalogue-produits-prestashop>

Iziflux lets you deliver your product catalog on

- Over 500 comparators (CPC and CPA) compatible in Europe. (GoogleShopping, Leguide, Twenga, Kelkoo, Shopping, Shopzilla, etc ...)

- Marketplaces (eBay, Amazon, Pixmania, Priceminister, Rueducommerce, Brandalley, Cdiscount, Fnac, 2xMoinsCher. Other marketplaces are being integrated permanente)
- The Affiliation platforms and cashback
- Solutions of retargeting

Stuff marketplaces are automatically imported into your back office Prestashop

Requirements

You need an IziFlux account.

If you don't have an account, the module allows you to create one through the backoffice

Installing IziFlux Module

Automatic install

1. In the admin section of your prestashop website, in the modules page, click on the button "Add New Module"
2. Select the downloaded module zip file,
3. Then click on "Upload this Module",
4. After the upload, install the module which is called "Iziflux v2.0 - by Profileo"

Manual Installation

1. Unzip the module you download; you'll have a folder named "eo_iziflux".
2. Copy / upload (ex. Using a FTP client) the folder in the "modules" folder of your prestashop website's directory.
3. Go to the admin section of your website and install the module named "Iziflux v2.0 - by Profileo".
